

Weekly Group Workshops

B247

28.02.2024

Workshops-2

Interview Questions

1. Tell me about yourself (workshop-1 question)
2. Why should we hire you?
3. What are your strengths and weaknesses?
4. Why do you want to work for this company?
5. Where do you see yourself in 5 years?

Presentation topics

1. How do data scientists use statistics?
2. In which areas of data science work do statistics play an important role?

Assignment Description:

Task Description:

In this task, as data science students, you are expected to understand and explain the role of statistics in data science. By researching relevant topics, you should indicate how statistics are used in data science processes and in which areas they play an important role.

Example Questions

[Python Questions \(link\)](#)

This GitHub repository contains over a hundred questions for 24 days, and each question has more than one solution. In this repository, you can solve questions that cover topics you have studied in your group work.

The answers to the four Python questions(workshops-1) from last week are in this repository (Day 1 and 2).

(Warning: skip questions on topics you have not learned.)
